Jeff Kimmelman, Chief Technology Officer & Principal Architect of Network & Security Technologies Inc to Speak at GKC's Cybersecurity Event on January 2007

New York, NY, December 2, 2006 --(PR.COM)-- The Global Knowledge Congress, the leading producer of regulatory focused teleconferences has announced today that Jeff Kimmelman, Chief Technology Officer and Principal Architect of Network & Security Technologies will speak at the Global Knowledge Congress's upcoming teleconference entitled: "Cybersecurity: How To Combat Hackers." This event is scheduled for the 2nd week of January 2007 at 10:00 AM (EST). (For further details and updated panelists of the event, please visit: www.knowledgecongress.org)

As we become more interconnected, network security attacks are at an all time high with new and innovative security threats being developed and executed. Increasingly, the burden of protecting companies from such attacks is falling on the Technology head. The Global Knowledge Congress has assembled a team of experts to help analyze these changes and their impact on the companies servicing this industry. These experts will present their findings, which includes a "best practice" panel, at a comprehensive two-hour teleconference scheduled for January 2007.
