Network & Security Technologies Launches New Web Site
Focus on Security and Infra-structure

(Pearl River, NY) December 2, 2010 – Network & Security Technologies, Inc. and Liqui-Site Designs Inc. announced today the launch of a new website for Network & Security Technologies, Inc. (N&ST), a unique consulting company that takes a comprehensive and holistic approach to security and network consulting with a specialization in assisting our clients in the electrical utility sector with NERC CIP compliance and critical infrastructure security consulting.

Headquartered in Pearl River, New York, Network & Security Technologies needed a professional web presence to showcase their breadth of knowledge and depth of experience in information network consulting services. While their specialization has always been in the electrical utility sector, N&ST has expanded its industry-leading services into the commercial and government sectors as well.

Adam Lipson, President and CEO of Network & Security Technologies, Inc., said “In developing a new website, our primary goal was to create a secure online environment that delivers better quality information to our clients. Liqui-Site’s work has enabled us to deliver better tools for our clients who are seeking to become compliant with the NERC CIP standards. The entire team at Liqui-Site Designs not only took the time to understand our unique business needs, but developed a robust, completely optimized site that is both secure and easy to navigate – and truly represents the high-quality reputation our brand has become synonymous with.”

The vibrant new site includes client case studies, downloadable white papers, a rich knowledge base on each of N&ST’s offerings, and more. Visit Network & Security Technologies online at (www.netsectech.com).
